Bill of Process

3.3 Bill of Process (BoP): A detailed list giving an overview of the time and ballpark costs needed to build the prototype. It includes:

Part No.	Enablers / Components	Estimated Cost	Manufacturing Process
1.	Horizon Robotics RDK X5 (4GB)	RM 369.00	Purchase
2.	2x Webcams (720p)	RM 30.00 - RM 160.00	Purchase
3.	ABS+ 3D Printer Filament (1kg "Harimau")	RM 34.25	Purchase
4.	Buck Converter (5V, 5A)	RM 6.00 - RM 9.00	Purchase
5.	Car Adapter	RM 5.00 - RM 23.00	Purchase
6.	Digital Buzzer	RM 2.00 - RM 5.00	Purchase
7.	LEDs	RM 0.10 - RM 0.60	Purchase
8.	Device Enclosure	-	3D Print
9.	Edge-AI Detection Logic	-	To Code

Flowchart

Project Timeline

Items	Week 1	Week 2	Week 3	Week 4	Week 5	Week 6	Week 7	Week 8	Week 9	Week 10	Week 11	Week 12	Week 13	Week 14
Problem Identification														
Analyzing user objectives and workflows														
PIC: All team members														
Gather all the user needs														
PIC: Hariz														
Interview user														
PIC: Alif/Hasif														
Design Requirements														
Identifying required design features														
PIC: All team members														
Design specification table														
User need 1: PIC Haykal														
User need 2: PIC Izzwafiy														
User need 3-5: PIC Hasif and Alif														
Solution Design														
Ideation for sub-system 1: PIC Izzwafiy														
sub system 2: PIC Haykal														
Design sketch
